EXPERIENCE

Full-stack developer freelancer — August 2023 – Present
Fiverr — *Part-time— Remote*

- Developed and optimized multiple Django-based web applications and FastAPI microservices, integrating external services such as egov.kz, kgd.kz, Kaspi API, and rbd.kz.
- Specialized in Django DRF for building Telegram CRMs, data parsing from websites, and performance optimization to ensure robust backend support and efficient functionality.

Web developer — August 2023 – Present
LLC Isker group — *Part-time— Remote*

- Developed and optimized multiple Django-based web applications and FastAPI, integrating external services and enhancing UI with HTML, CSS, and JavaScript.
- Achieved high client satisfaction and successful deployment across varied projects.
- Specialized in PostgreSQL database management and performance optimization, ensuring robust backend support and efficient application functionality.

Web Developer — August 2020 – June 2023
Devex service — *St. Petersburg , Russia*

- Full-Stack Backend Development: Maintained and enhanced websites using JavaScript, PHP, and Django Python stacks, and developed microservices using Tarantool and Lua, reducing operational costs by optimizing database and cache systems.
- Microservice and Containerization: Built and managed microservices in Docker for company sites and apps, using Laravel, WordPress API, Django, and No-Code platforms.
- Optimization of Front end development: Led frontend development with NextJS and Vuex, improving interface performance and user engagement.

Full-stack WebDeveloper — July 2019 – March 2020
Perfect systems LLC — *Moscow, Russia*

- Led a team to develop 'Golden-eye', a web parsing system that collects and analyzes reviews of doctors and medical institutions in the United States.

Web Developer — July 2019 – March 2020
Evrika LLC — *Shymkent, Kazakhstan*

- Client Engagement and Requirements Analysis: Regularly engage with clients to understand their core objectives and requirements, ensuring that all web resources are aligned with their needs.
- Programming and Development: Write and implement programs essential for the functionality and maintenance of websites and control systems, addressing both front-end and back-end requirements.
- Site Maintenance and Issue Resolution: Actively manage, process, and maintain various sites, ensuring optimal performance and resolving operational issues as they arise.
